

VAC HOG™

PUMPS

## VAC HOG™ Vacuum Interceptor engineered for the toughest hazardous waste recovery applications.

Handling hazardous waste requires more than just powerful vacuum equipment, it requires protection, separation, and compliance.

The Vac Hog TVP-55 Vacuum Drum Interceptor is designed to meet the toughest industrial and automotive hazardous waste recovery demands by safely capturing hazardous solids and liquids before they reach your main vacuum pump. Prevents the need to transfer material into a larger vacuum tank so it can be disposed of safely and securely.

## Vac Hog Benefits

- Converts any 55 gallon 3 ribbed steel oil drum into a powerful portable vacuum containment receptacle.
- Efficient separation of hazardous solids and liquids.
- Protection for industrial vacuum pumps
- Reduced maintenance and downtime
- Includes built-in automatic shut off valve to prevent carryover of liquid.
- Improved operator safety

## Application

- Oily sludge and wastewater
- Metal shavings and debris
- Coolants and hazardous liquids
- Contaminated solids

## Technical Specifications

<b>Model</b>	TVP-55
<b>Connection Size</b>	2-3 inch
<b>Solids Handling</b>	Up to 1¼" Spherical solids
<b>Operating Speed</b>	up to 400 RPM
